Manage

3stepIT

Asset management platform

Automate and simplify key processes across the IT asset lifecycle.

A platform for smart, intuitive IT lifecycle management

Digitised IT process management

Adaptable and easy to use, our asset management platform supports the entire IT device lifecycle: acquire, manage and refresh.

Single source of the truth

Get a centralised view of all the assets within your business. Drill down into asset status and see in an instant its what, when, where, who and how much.
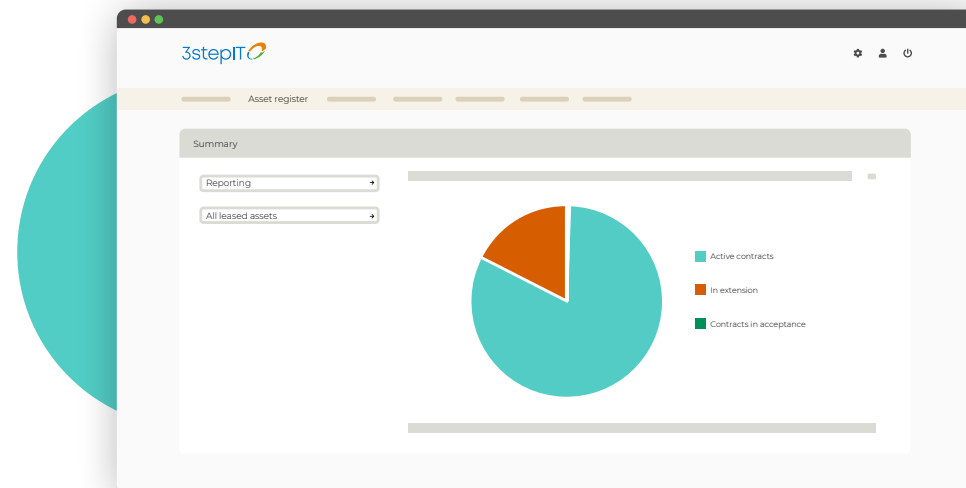

Convenience, flexible oversight

Designed to transform how you manage your IT hardware, the asset management platform can be integrated easily with your in-house applications. Plus we offer additional digital services that add further depth to your device management capabilities.
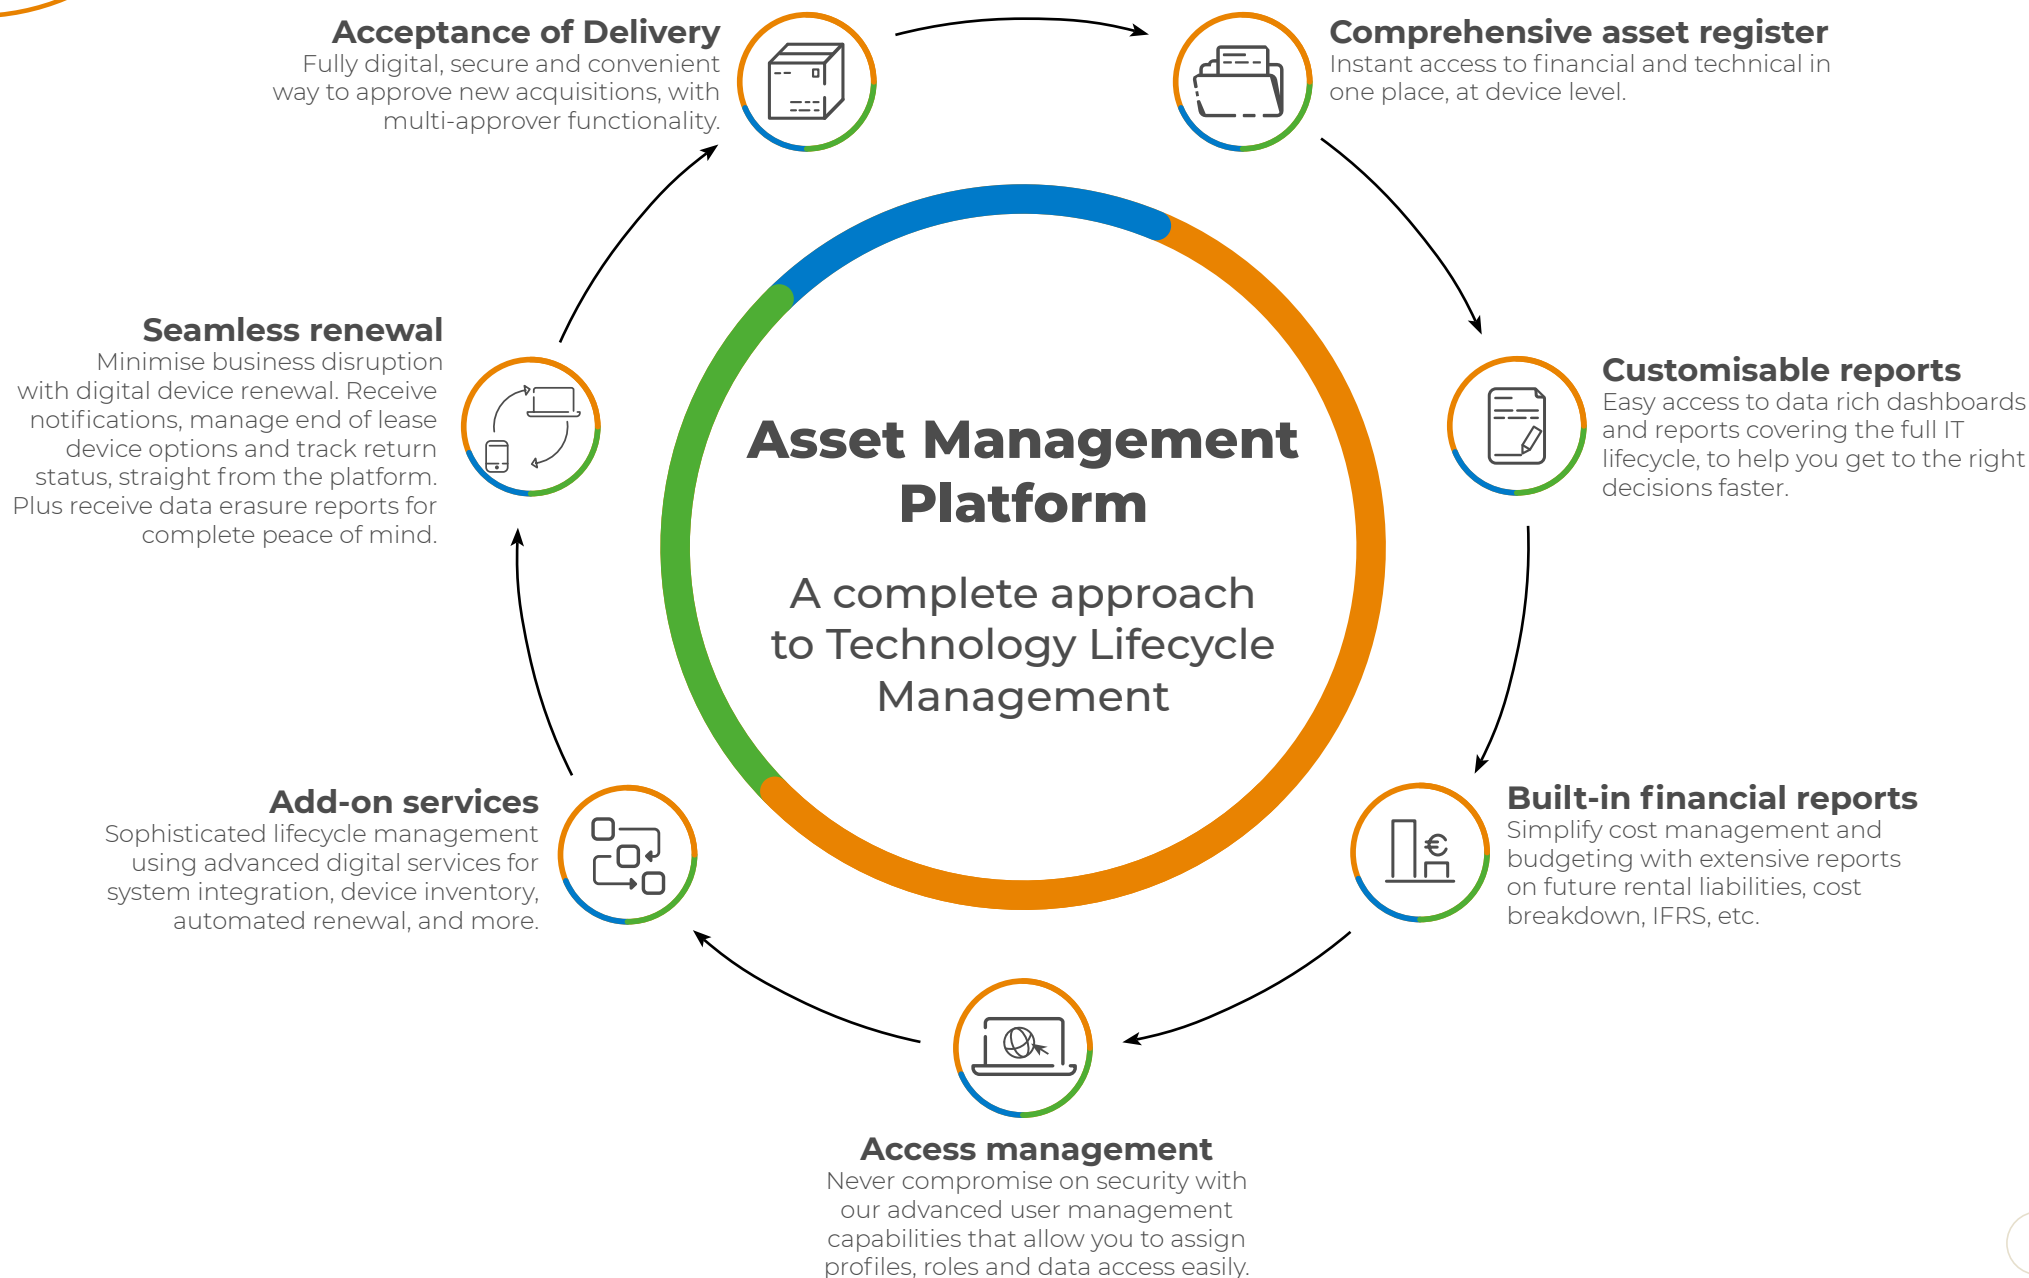

Portfolio insights

Easily allocate costs, control budgets and maximise the return on investment from your technology. Tap in to valuable insights and metrics to help you make smart choices.

3stepIT

Acceptance of Delivery
Fully digital, secure and convenient way to approve new acquisitions, with multi-approver functionality.

Comprehensive asset register
Instant access to financial and technical in one place, at device level.

Seamless renewal
Minimise business disruption with digital device renewal. Receive notifications, manage end of lease device options and track return status, straight from the platform. Plus receive data erasure reports for complete peace of mind.

Asset Management Platform

A complete approach to Technology Lifecycle Management

Customisable reports
Easy access to data rich dashboards and reports covering the full IT lifecycle, to help you get to the right decisions faster.

Add-on services
Sophisticated lifecycle management using advanced digital services for system integration, device inventory, automated renewal, and more.

Built-in financial reports
Simplify cost management and budgeting with extensive reports on future rental liabilities, cost breakdown, IFRS, etc.

Access management
Never compromise on security with our advanced user management capabilities that allow you to assign profiles, roles and data access easily.

Customer testimonials

" The platform gives us more control! It may sound like "1984" but having the asset register means we have better foresight, can answer questions (what kind of IT equipment we have, what to be replaced and the monthly cost) and, above all, are well prepared for the next procurement. We know what we have and what we want!

Martin Hansen
Chief of Department, Municipal Administration
Enköping Municipality, Sweden

" The platform has given us an overview of what equipment we have, who uses it and when to replace it. What was previously managed in an Excel sheet is now automated, so we can access the latest information on our devices at anytime.

Jesper Smedegaard Bertelsen
Head of IT Service Desk
Nobia Denmark A/S

" 3stepIT basically took away all of the difficulties that surrounded dealing with the IT solution and its implementation.

Martin Arnold
Managing Partner,
Wedlake Bell

About us

3stepIT is a Technology Lifecycle Management provider with an ambition to reduce e-waste by helping businesses to consume technology more sustainably. 3stepIT offers an end-to-end approach to accessing, managing and refreshing IT devices that is cost-efficient, secure and environmentally friendly.

Today we serve more than 3,000 customers worldwide and play an active role in the circular economy by refurbishing and reselling end of life IT devices. In doing so, we prevent over half a million devices from being destroyed and sent to landfill each year.
