

# Don't waste IT, R3stepIT

Give your unwanted  
IT devices a new life and  
boost your IT budget.

## What we will do:

- Buy your used devices at market value
- Data erasure using best in class methods
- Refurbish them for reuse
- Recycle when absolutely necessary

## How you will benefit:

- Dispose of your unwanted IT equipment securely
- Receive cash for your used devices to boost your IT spending power
- Go green – halve electronic waste and reduce CO<sub>2</sub> emissions by 36%

**REfurbish | REuse | REcycle**

# REstepIT

The simple, secure and sustainable solution for old IT equipment

Many businesses feel there's no alternative to dumping or destroying their old IT equipment. No wonder e-waste is the world's fastest growing type of waste. Experts believe e-waste will reach 57.4 million metric tonnes by 2021, with recycling rates stagnating. But there's a hassle-free alternative in which everyone wins, even the planet.

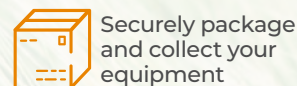

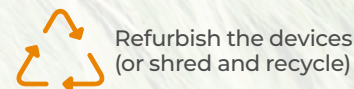

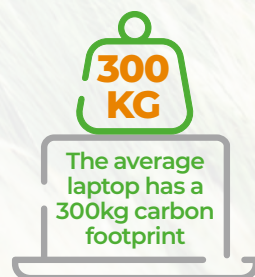

## Introducing REstepIT

Simply sell us your obsolete devices. We'll collect them to be securely wiped and refurbished for reuse. You'll reduce your carbon footprint, plus you'll get market value for old devices.

## Everyone benefits

With REstepIT, you boost your IT budget and together we put an end to e-waste and cut global emissions. The e-waste recycling rate only grew by 0.5% since 2014 and with the average laptop having a 300kg carbon footprint, reselling your IT hardware for reuse can have a huge impact – on your business and on the planet.

## Did you know?

We do all the heavy lifting for you. In just four weeks we will:

- 1 Give you a quote
- 2 Securely package and collect your equipment
- 3 Erase device data
- 4 Refurbish the devices (or shred and recycle)
- 5 Grade each device and pay you market value
